Available for Summer 2027 co-op work term | Co-op eligible

Professional Summary

Third-year Bachelor of Information Technology (Networking and Security) student seeking a cybersecurity or cloud co-op placement. Hands-on experience with Microsoft Azure (AZ-900 certified), AWS, Active Directory, Windows Server, enterprise routing, IAM, and log analysis.

Education

Ontario Tech University <i>Bachelor of Information Technology (Networking and Security)</i>	September 2025 – April 2027 <i>Oshawa, Ontario</i>
Durham College <i>Computer Systems Technician Diploma — Ontario Tech bridge/pathway program</i>	September 2023 – April 2025 <i>Oshawa, Ontario</i>

Relevant Coursework

Advanced Networking I & II, Network Administration, Computer Security, Data Communications and Networking, Cloud Services, PowerShell, Computer Architecture, Data Structures, Object-Oriented Programming

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900) — May 2026
Cisco Networking Academy: Switching, Routing and Wireless Essentials (CCNA course series)

Technical Skills

Cloud: Microsoft Azure (Functions, Entra ID / Azure AD, Storage, Azure Monitor, IAM policies), AWS (EC2, S3, IAM, VMs, monitoring)
Security: IAM, least privilege, log analysis, risk assessment, vulnerability analysis, incident response, firewall rules, network segmentation, Microsoft Sentinel, KQL, MITRE ATT&CK
Networking: VLANs, subnetting, TCP/IP, OSPFv3, EIGRP, BGP, NAT, DHCP, DNS, VPN setup, port forwarding, Cisco IOS
Systems & Tools: Windows Server, Active Directory, Group Policy, PowerShell, Linux, Git/GitHub, virtualization
Languages: Python, Java, SQL, JavaScript, HTML/CSS

Projects

Azure Sentinel SOC Lab: Brute Force Detection <i>Microsoft Sentinel, KQL, Azure Monitor Agent</i>	September 2026
- Connected an isolated Azure VM's security logs to Microsoft Sentinel via a custom Data Collection Rule. - Wrote a KQL rule detecting brute-force RDP activity and deployed it as a live Sentinel Analytics Rule. - Simulated an attack and documented findings in an incident report mapped to MITRE ATT&CK.	
Advanced Enterprise Network Design Project <i>Cisco IOS, OSPFv3, EIGRP, BGP</i>	December 2025
- Designed a multi-tier network spanning core, distribution, access, and edge layers. - Deployed and tuned OSPFv3, EIGRP Named Mode, and MP-BGP with route redistribution and NSSA areas. - Validated end-to-end reachability and documented the addressing scheme and routing policy.	
Azure Function Deployment & Cloud Security <i>Azure, PowerShell, Azure CLI</i>	October 2025
- Deployed serverless apps in Azure Functions with resource groups separated by environment. - Administered IAM through Azure Active Directory and hardened storage, monitoring logs in Azure Monitor.	

Experience

Durham College — Server Room Technician <i>Volunteer</i>	February 2025 – August 2025 <i>Oshawa, Ontario</i>
- Maintained a shared virtualization environment serving 3+ classrooms and 100+ students per term. - Configured and managed DHCP scopes and supported DNS within a student lab network. - Authored documentation to standardize repeat deployments for future terms.	
Council of Islamic Guidance — Sunday School <i>Technical Department Assistant (Volunteer)</i>	September 2022 – June 2023 <i>Pickering, Ontario</i>
- Configured routers, access points, and local networks to improve facility-wide connectivity. - Provisioned secure Wi-Fi and administrative accounts supporting over 150 students. - Supported surveillance and access control systems, gaining exposure to physical and logical security.	

Leadership / Extracurricular

Networking & IT Students Association, Member (Fall 2024 – Present) — Attended TacOps and other CTF events.
